

Installed in your stack. Built to be trusted.

One system for the SalesGency site, proposals, decks, price sheets and every AI-generated asset. It is short on purpose: if a rule here doesn't help someone make a decision, it isn't here.

SalesGe

AI revenue
workflows for
modern GTM
teams.

ESSENCE

What we say, and why it's believed.

SalesGency installs AI revenue workflows inside your existing stack, so every lead gets worked, every conversation becomes usable data, and every next step moves forward.

1. Outcome

More pipeline gets worked. Less revenue work is lost to handoffs, admin and incomplete data.

2. Mechanism

We design and install AI workflows across inbound, outbound and post-call operations.

3. Proof

Built by a GTM AI and automation operator with a background in tech sales and production systems.

Every page and campaign follows that order: lead with the result, explain the system, then prove it. Never open with the model, the framework or

the vendor list.

Operator- built

Written and shipped by someone who has carried the number.

Production- minded

Guardrails, owners, failure paths and documentation come with the build.

Stack- flexible

We work inside the tools a team already uses.

Team stays in control

Humans approve what matters. Clients own the workflow.

LOGO

The wordmark.

The wordmark is Outfit Bold set tight, ending in a cyan dot. The dot is the brand's signature: a live signal, and the full stop on every claim. It never changes color and it is never removed.

Primary, on light

Ink wordmark, cyan dot. Default for the site, documents, email and proposals.

Reversed, on dark

White wordmark, cyan dot. Use on Ink or any dark photo surface.

Signature gradient, dark heroes only

Mark

For favicons, avatars and app icons,

White "Sales", cyan-to-indigo
"Gency". One per screen, on Ink.
Not for small sizes or print.

where the wordmark won't fit.
Rounded square, S plus the dot.

Clear space and minimum size

Keep clear space equal to the height of the capital S on every side.

Nothing enters that zone: no text, edge, photo detail or second logo.

Minimum sizes: wordmark 96px wide on screen, 24mm in print. Mark 24px.

Don't

Retiring two variants. The two-tone "Sales / Gency" blue-to-navy wordmark (Space Grotesk) and the Geist version of the gradient wordmark are replaced by

the outlined Outfit versions above, so every logo file matches and no wordmark depends on a font loading.

COLOR

Ink and mist, with one signal.

The brand is mostly quiet: a deep ink, a cool off-white ground and slate text. Cyan is the signal. It appears as the dot, on dark surfaces and in small marks, so when it shows up, it means something.

Ink #0A1428 RGB 10 20 40 Wordmark, headlines, dark surfaces	Mist #F4F9FC RGB 244 249 252 Default page ground	Signal Cyan #00C2FF RGB 0 194 255 The dot, accents on dark. Never text on light	Action Blue #0369A1 RGB 3 105 161 Links and small blue text on light
Indigo #7C3AED RGB 124 58 237 Gradient end, rare emphasis	Slate #475569 RGB 71 85 105 Body copy on light	Muted #566579 RGB 86 101 121 Captions, labels, footers	Line #DCE6EE RGB 220 230 238 Hairlines, card borders

Proportion

Signature gradient

Dark surfaces

Cyan to indigo at 135°. One gradient per view, on dark surfaces, for a hero word, a rule or a progress bar. Never behind body text.

Ink, raised Ink #111E38, and dark line #22314F. Text is Mist with #B8C4D6 for secondary copy.

Contrast, checked

TEXT	ON	RATIO	USE
Ink	Mist	17.3 : 1	Headlines, UI text
Slate	Mist	7.2 : 1	Body copy
Muted	Mist	5.6 : 1	Captions and labels
Action Blue	Mist	5.6 : 1	Links, small blue text
White	Ink	18.4 : 1	Reversed text
Signal Cyan	Ink	8.9 : 1	Accents on dark
Signal Cyan	White	2.1 : 1	Never text. The dot only

Pitch deck fix. The current deck uses #0284C7 for small text on white (4.1:1, below AA) and a stray purple #5B2BFF. Use Action Blue #0369A1 and Indigo #7C3AED instead.

TYPOGRAPHY

Two faces, one job each.

Outfit

Aa

Inter

Headlines, numbers, buttons
and the wordmark. Weights
600, 700, 800. Set tight (–2%
to –3% tracking).

Body copy, tables, captions,
form fields. Weights 400, 500,
600. Use tabular numbers for
prices and metrics.

Display · Outfit 800
56–68 / 1.02

Stop losing pipeline to manual work.

H2 · Outfit 700
32–40 / 1.1

Three engines. One connected revenue system.

H3 · Outfit 600
20 / 1.25

Inbound Conversion Engine

Body · Inter 400
16–17 / 1.65

Your revenue team does not need another
disconnected AI tool. It needs the work between its
tools to happen reliably.

Label · Inter 600
12 caps, +12%

ENGINE 01 · DIAGNOSTIC · CUSTOM SCOPE

Numbers · Outfit
800
tabular

\$2,500

Sentence case everywhere except labels. Headlines end with a full stop when
they make a claim. Keep lines to about 65 characters. Nobody wants to read
120-character lines.

Plain, specific, on the operator's side.

We sound like the person who has actually run the pipeline: direct, calm and precise. We name the problem in the team's own words and say exactly what we will install.

Lead with the business result, not the model, framework or vendor stack.

Say "installed in your stack," not "all-in-one platform." The implementation model is the differentiator.

Use "AI revenue workflows" as the category phrase. Use "agents" only when explaining one specific workflow.

One call to action everywhere: "Get a GTM teardown."

No unearned proof. No invented metrics, customer logos or testimonials. Add proof only when it can be verified.

Keep the vendor list off the homepage. Name only systems we have actually implemented.

Block open deals

Human review
Approval gate

Cards

White on Mist, 1px Line border, 14px radius, no shadow. Lift only the one card that needs it (the recommended offer), with a 2px Ink top border.

Icons

Simple 1.5px line icons in Ink. No emoji as icons or bullets; the current deck uses them and they should be replaced.

Cyan dot

The dot is also our list bullet, our status marker and the full stop on H2s. Don't use it for anything decorative.

Layout

12-column grid, 1120px max width, 72px between sections on desktop, 48px on phones. Left-aligned text.

Radius

8px inputs and chips, 14px cards, 10px buttons, full round for pills and the dot.

Imagery

Real workflow diagrams, real screenshots of the systems we build, and clean product detail. No stock handshakes, no robots, no glowing brains.

APPLYING IT

Where the brand shows up.

ASSET	GROUND	LOGO	NOTES
Website	Mist, Ink hero band	Primary in nav, reversed in footer	Nav: Engines, How it works, About, Get a GTM teardown
Pitch deck	White and Ink	Wordmark top-left on cover, small in corner	Outfit headlines, Inter body, no emoji
Proposals and SOWs	White with Ink cover	Reversed on cover	Keep the dark cover, standard Inter body
Price sheet	White	Primary	One page. Prices in Outfit with tabular numbers
Email signature	Transparent	Primary at 120px wide	Name, title, hello@salesgency.com, salesgency.com
Social avatar	Ink	Mark	S plus dot, centered with clear space
Footer legal line	Any	none	"SalesGency is a d/b/a of Diamitani Industries."

Drop it into any agent.

Give your harness the token block below plus the one-page brand brief. Together they let any model produce on-brand pages, decks and copy without seeing this whole document. Files ship as **BRAND.md**, **tokens.css** and a **salesgency-brand** skill.

Copy tokens

Before anything ships, check

- ☐ The result comes first; the tools come last.
- ☐ The CTA reads "Get a GTM teardown" and there is exactly one primary button.
- ☐ Colors come from the tokens. Cyan is never text on a light ground.
- ☐ Headlines are Outfit, body is Inter, no emoji, no invented proof.
- ☐ The wordmark is an approved file with its dot and clear space.
- ☐ Prices match the current price sheet.
