

 EXECUTIVE ACTIVATION PLAN • 6-MONTH CONSULTING ENGAGEMENT

Internal GTM & Forward Deployed AI Infrastructure

A high-velocity, customized consulting engagement to architect, deploy, and scale autonomous revenue workflows and AI agent infrastructure across Praecipio Consulting.

 TERM & STRUCTURE 6-Month Activation Predictable consulting retainer with mutual option to renew	 KEY DATES Kickoff: Oct 5, 2026 Initial assessment Sept 28 • Q1 2027 3-month review	 CORE DELIVERABLES 6 Custom Workflows Plus ongoing ad-hoc forward-deployed AI engineering	 CONSULTANT Patrick Diamitani Forward Deployed AI Engineer & GTM Strategist
--	---	---	---

**Executive Summary Note:** Praecipio gains immediate forward-deployed engineering capacity without FTE overhead, recruiting delays, or severance liabilities.

Begin Presentation →

SLIDE 02 • THE STRATEGIC PIVOT

Consulting Engagement vs. Internal FTE Hire

While Praecipio initially considered an internal GTM or Forward Deployed AI Engineer hire, a **6-month consulting activation** delivers dramatically faster execution, guaranteed workflow deliverables, and eliminates enterprise hiring friction.

TRADITIONAL PATH

Internal FTE Employee Hire

High Friction

- ❌ **60–90 Day Ramp:** Lengthy interviewing, corporate onboarding, and ramp delays before initial output.
- ❌ **Heavy Corporate Burden:** Payroll taxes, health benefits, 401(k), equity vesting, and executive recruiting fees (+25%).
- ❌ **Single-Discipline Constraints:** Internal roles are often pigeonholed into narrow job codes rather than cross-functional GTM systems.
- ❌ **Severance & Long-Term Liability:** Difficult and costly to pivot if internal priorities or budget cycles shift.

RECOMMENDED STRATEGY

6-Month Consulting Activation

🚀 Optimal ROI

- ✅ **Immediate Day 1 Execution:** Kickoff on Oct 5 (Assessment Sept 28). First production pipeline live in weeks.
- ✅ **Guaranteed Deliverables:** 6 custom production workflows tailored to Praecipio's tech stack + ongoing ad-hoc engineering.
- ✅ **Zero Corporate Overhead:** 100% fixed consulting fee. Zero taxes, zero benefits, zero recruiting markups.
- ✅ **Built-in Flexibility:** 3-month performance checkpoint (Q1 2027) with a mutual option to renew or expand.

Risk profile: Heavy financial commitment with uncertain time-to-first workflow.

SLIDE 03 • CORE DELIVERABLES CATALOG

Bottom Line: Senior AI architect output at a fraction of full-time cost.

SLIDE 04 • AMITANI INDUSTRIES x PRAECIPIO CONSULTING ACTIVATION PLAN

SLIDE 03 • CORE DELIVERABLES CATALOG

The 6 Core Custom Workflows

Senior AI architect output at a fraction of full-time cost. Senior AI architect who delivers tangible software and revenue pipelines, not theoretical slide decks.

Tailored to Praecipio's Tech Stack

Six battle-tested, customized automations deployed sequentially across Praecipio's GTM organization, backed by continuous ad-hoc engineering support throughout the 6-month activation.

WF-01 Outbound

Customized Prospect Automation Workflow

Autonomous ICP Sourcing, Multi-Tier Research & Hyper-Personalized Messaging

Combines Praecipio's technical stack with defined Ideal Customer Profiles (ICPs) to dynamically source high-value accounts, conduct in-depth executive research, and dispatch personalized multi-touch outreach on behalf of sales reps.

Target: 24.2% Reply Rate

WORKFLOW #01 • OUTBOUND

AEORIM AI

Customized Prospect Automation Workflow

Engineered to replicate top-tier SDR intelligence at scale. The system monitors trigger events (tech stack additions, executive appointments, Atlassian cloud migrations, funding milestones), aggregates account insights across platforms, and generates tailored PAS (Pain-Agitation-Solution) messaging calibrated to the individual rep's voice.

CORE CAPABILITIES

- ✓ Automated ICP lead scraping and data enrichment pipeline
- ✓ AI research synthesizer generating prospect battle cards
- ✓ Dynamic variable templating engine for high-converting multi-stage outreach

WORKFLOW #02 • INBOUND

VNTNR Logistics

Customized Inbound Automation Workflow

Every second delay on inbound leads reduces conversion. This workflow ingests inbound submissions in real-time, queries company databases to enrich buyer firmographics, executes AI intent analysis to separate high-value opportunities from spam or support tickets, assigns territories, and notifies reps via Slack/Teams with ready-to-send responses.

CORE CAPABILITIES

- ✓ Webhook listener and payload normalization layer
- ✓ AI intent classification and spam filtering module
- ✓ Automated territory and industry-based routing logic

WORKFLOW #03 • MEETINGS

Internal Core

Customized Pre-Call Intelligence Workflow

Eliminates pre-meeting preparation overhead. 60 minutes before any scheduled discovery or scoping conversation, the rep receives a concise, actionable executive dossier containing: attendee career background, company recent news, active Jira/Atlassian initiatives, potential pain points, and recommended discovery questions.

CORE CAPABILITIES

- ✓ Calendar event listener with automated attendee extraction
- ✓ Multi-source intelligence gathering engine
- ✓ One-page executive briefing dossier generator

Blueprint

Post-Call Action, Health Telemetry & GTM Dashboard

Immediate Impact: Reps save 15+ hours weekly on prospecting research, eliminate manual inbound routing delays, and walk into every executive call fully briefed, ensuring 99.9% uptime with daily telemetry logs, and giving leadership single-pane revenue visibility.

Next: Workflows 4-6 →

**WORKFLOW #04 •
MEETINGS**Internal
Core

Customized Post-Call Synthesis & Action Workflow

No deal momentum is lost post-call. The workflow connects to Gong, Chorus, or Fireflies, parses the discussion, extracts agreed action items and technical requirements, maps them directly into CRM custom properties, and creates a formatted follow-up email in the rep's draft folder within 5 minutes of call completion.

CORE CAPABILITIES

- ✓ Call transcript ingest webhook and speaker diarization parser
- ✓ MEDDPIC / BANT deal scorecard and action item extractor
- ✓ Bi-directional CRM notes and deal-stage updater

**WORKFLOW #05 •
REPORTING**VNTNR
Logistics

Customized Daily Execution & Health Report

Guarantees enterprise reliability and transparency. Each morning at 8:00 AM, Praecipio leadership and revenue operations receive an automated digest displaying: total outbound sequences fired, inbound leads processed, pre/post briefings compiled, and an error log detailing any API rate limits or failed runs with self-healing recommendations.

CORE CAPABILITIES

- ✓ Real-time execution listener and error-catching wrapper
- ✓ Automated daily run spreadsheet sync and archival
- ✓ Slack executive morning briefing summary

**WORKFLOW #06 •
INTELLIGENCE**ARCHIN
Robotics

Customized Go-To-Market Executive Dashboard

Modeled after elite revenue intelligence interfaces (such as the ARCHIN Robotics command center). Features interactive funnel analytics, lead velocity tracking, revenue attribution by source, outbound vs inbound performance breakdowns, top rep leaderboards, and automated forecasting projections.

CORE CAPABILITIES

- ✓ Multi-source data ingestion and ETL pipeline
- ✓ Real-time KPI metrics engine (ARR, Pipeline Value, Conversion Rates)
- ✓ Visual funnel stage and pipeline velocity chart components

Sprint Add-on (Weeks 7–10)

HIGH IMPACT • AUTONOMOUS OUTBOUND Custom Autonomous SDR Agent

Connecting Claude 3.5 / Gemini models with live chatbot access to execute end-to-end GTM activities: autonomous prospect qualification, cold call prep, multichannel outreach drafting, objection handling research, and personalized follow-ups.

CAPABILITIES INCLUDED

- ✓ Interactive Slack/Teams chatbot assistant for sales reps
- ✓ Real-time company search and buyer intent scanning
- ✓ Natural-language query: "Find 20 Director of IT leads at FinTech firms in Austin"
- ✓ Automated cadence generation with tone matching rep style

Sprint Add-on (Weeks 11–14)

WORKFORCE PRODUCTIVITY • AI NATIVE Custom Sales Enablement Agent

Connecting and structuring Praecipio's entire GTM tech stack for optimized, unified performance through an AI-native internal operating system for all employees, consultants, and account executives.

CAPABILITIES INCLUDED

- ✓ Universal knowledge retrieval across Praecipio case studies, SOWs, and decks
- ✓ Instant proposal and pricing scope recommendation generator
- ✓ Competitor battlecard synthesis and objection response assistant
- ✓ Automated onboarding assistant for new sales & consulting hires

Sprint Add-on (Weeks 15–18)

LONG-TERM SCALE • ORG ENABLEMENT Custom GTM Center of Excellence (CoE)

Building an enduring internal Center of Excellence featuring AI-generated video tutorials, tool walkthrough curriculums, and a centralized, version-controlled library of internal skills, workflows, and prompts.

CAPABILITIES INCLUDED

- ✓ Automated high-definition video walkthroughs on tool usage and best practices
- ✓ Curated curriculum for onboarding new team members on AI-native workflows
- ✓ Centralized prompt and automation skill repository with version control
- ✓ Quarterly operational playbook updates and continuous skill benchmarking
