

Combined Overview :

Patrick Diamitani and Diamitani Industries

As of 7.16.26 4:57pm, Chicago, IL

Patrick Diamitani is a 35 year old AI Engineer. Currently employed at Atlas HXM where he is the GTM AI & Automation Manager. He supports AI and Automation work across sales, marketing, operations, legal and product. He's built prospect outreach automations for sales reps, a compliance checker automation for legal and ops (to check automatically if a prospect needs KYC guardrails), an inbound MQL workflow to categorize requests and send automated response emails and more. He's fluent in building skills and agents using harnesses and llm-agnostic .md files. This includes over 30 skills across departments and categories for Atlas and beyond (personal use and customer deployment). He is looking for a new role as a forward deployed engineer at a company like xai open ai anthropic, google, meta, a role as an ai research scientist based on his work on the ROSTR formula for agent creation (currently on the website at www.diamitani.com as well as rostr-paper.vercel.app. and/or developer advocate for an impactful ai startup (creating tutorials and videos, speaking at events, engaging with the community). He has a portfolio of domains and ideas he's looking to build into ai generated web applications, for additional side incomes, paired with a system of company agents to help him manage as he works, learns and grows. Here's more data about him below:

- Resume
- Rostr paper
- Portfolio from atlas
- Skills from atlas and beyond
- Custom gpts
- Product overviews for each product

About Us

Diamitani Industries, Incorporated is a New York Registered C-Corporation, established in 2014 by Patrick Diamitani and himself as the registered agent (originally at 44 Wall Street, NY, NY 1005, Suite 1262).

Currently, it is a holding company for several of Patrick Diamitani's creative, business and financial assets, including software applications, art collections, consulting agencies and more across multiple industries in the United States.

The goal is for this to be an empire and personal brand for Patrick Diamitani, his family and future generations, upon the 64th 64th and beyond if called to do so.

It means it must stay in the family, be used for good, and be a shield and protection against falsehoods, bad debts, poverty and unprofitable enterprises.

One day, this established firm shall have no less than \$300,000,000,000 in liquid cash holdings, before the day I am 72 years old.

Best,
Patrick Diamitani

Portfolio

Patrick Diamitani's current portfolio includes:

Domains

GoDaddy

- Artispreneur
 - Contract Agent
 - Directory
 - Academy
 - Agent
- Civic Pie
- GencyAI
- LetsVibeAI
- Your48
- Huddle Cowork
- Salesgency
- Artist EPKs
- Monarch
- 6th Agent

AWS

- RostrHub
- Rostr Agent
- Credit Fixer
- Diamitani Industries
- ReplyAll

Approach

Each one of these currently need a v1 production deployed website, a gtm outreach engine, a marketing content engine and a live/in person partnership system (events, sponsorships, etc) all driven by AI. A master team to manage breaks in production (QA), handle all transactions,

disputes, receipts (finance), handle brand strategy and schedule (advertising), understand what's going on with systems and improvements (ops) and oversees overall structure and recommends game plan.

This is what will help me excel. A ROSTR powered agent system that takes each idea and builds a team of agents around it, powered by Rostr. Each with composio for integrations, Agentmail for email and AWS backend infrastructure and bedrock llms. Deployed on Github.

Artwork

- Music (original)
- Music (Suno)
- Photography (AI Enhanced)

Approach

Each of these need a separate strategy to sell. For music, must have a licensing and distribution strategy to get dreams, into tik tok, instagram, reels, etc. natural influencers and more. For the art just needs a custom e-commerce site and paid ads on platforms to sell the art to interested buyers and maybe a platform to help people sell their own to make money off that long term.

Agencies

- Diamitani Industries General Agency
- SalesGency GTM Sales Consulting
- GencyAI AI Consulting
- Artispreneur Agency Services

Approach

These agencies need a clear website, a CTA, time to book with me or a marketplace engineer to sell ecommerce buildpackages, or a qualifyign agent that takes inbound calls and messages and connects with customers and gtm engineer for outreach on each system high and low ticket items. It needs to be done. And run while i sleep and have a back end agent to do the projects with the PAL intake agent and client dashboard on site.

Consulting

Updated 7.16.26 4:41pm
